CONTENTS FOR
HEAT TRANSFER-Japanese Research
Volume 14, Nos. 1-4, 1985

NUMBER 1

1 Critical Moisture Content in a Continuous Dryer
Ikuro Shishido, Masaru Cgino, Mutsumi Suzuki and Shigemori Ohtani

19 OTEC Plant Consisting of Plate Type Heat Exchangers
Haruo Uehara and Tsutomu Nakaoka

36 Measuring Thermal Diffusivity of Liquids by Stepwise Heating (The First Report, Principle of Measuring Method and Theoretical Analysis of Errors)
Nobuyuki Araki and Kazushi Natsui

56 Measuring Thermal Diffusivity of Liquids by Stepwise Heating (The Second Report, Heat Loss Characteristics and Measurements on Molten Salts)
Nobuyuki Araki, Kiyosi Kobayasi and Masa-aki Ochi

75 Three-Dimensional Flow and Heat Transfer in a Rectangular Cavity
Munehiko Hiwada, Ikuo Mabuchi and Masaya Kumada

NUMBER 2

1 Determination of Kinetics and Heat of the Consecutive Thermal Decomposition of Solid by Simultaneous DTA-TGA Method
Naotsugu Ito, Kenzaburo Obata, Toshikatsu Hakuta and Hiroishi Yoshitome

16 Thermal Radiation Properties of Transition Metals and Alloys in the Liquid State
Toshiro Makino, Takeshi Kunitomo, Hiroyuki Hasegawa, Yoshiyuki Narumiya and Shohei Matsuda

30 Experimental Investigation on Film Cooling of a Gas Turbine Cascade
Shinzo Kikkawa and Yoshihiro Iwasaki

45 Heat Transfer from the Wall to a Particle Bed in a Rotary Drum
Naotsugu Ito, Kenzaburo Obata, Toshikatsu Hakuta and Hiroishi Yoshitome

60 Heat Transfer Problems of a Cylindrical Capsule for Latent Heat Thermal Energy Storage (for the Case of Slowly Variable Wall Temperature)
Sadasuke Ito

76 Natural Convection Heat Transfer in a Partitioned Enclosure (Numerical Study)
Naomichi Heya, Masanori Takeuchi and Teruo Kimura

NUMBER 3

1 Influence of Free-Stream Turbulence on Heat Transfer at the Rear Surface of a Cylinder (Effect of High Frequency Turbulence)
Hajime Fuse, Takayuki Oyama, and Shuuichi Kanamori

21 Heat Transfer Coefficient between an Inserted Vertical Tube and a Three-Phase Fluidized Bed
Yasuo Kato, Yoshifumi Taura, Tokihiro Kago, and Shigeharu Morooka

32 Temperature Distribution in a Two-Layer Disk Composed of a Metal and a Coated Film with Laser Irradiation
Etsuji Ohmura, Yoshiharu Namba, Saburo Makinouchi, and Yoshihiro Sekimoto

47 Analysis of Natural Convection Heat Transfer at the Walls of Packed Beds with Voidage Variations
Tatsuo Nishimura, Yuji Kawamura, Toru Takumi, and Hiroyuki Ozoe

55 Pinch Temperatures in Rankine Cycle Power Generation Utilizing Heat Sources of Medium and Small Temperature Differences
Yukio Yama and Yasuo Mori

84 Dry-Out Characteristics of Heat Pipes
Masashi Kuramae and Masahide Matsumoto

NUMBER 4

1 Measurements of Local Surface Temperature Using P-N Junctions of Semiconductors
Tsuyoshi Asano and Satoru Iuchi

7 A Two-Dimensional Simulation of Dropwise Condensation
Yoichi Chiba and Shigemori Ohtani

26 Chugging Phenomenon Induced by Steam Condensation into Pool Water (Amplitude and Frequency of Fluid Oscillation)
Izuo Aya and Hideki Nariai

44 Theoretical Study on Boiling Heat Transfer from Finned Tube Bundles
Shi Gie Jho, Ryohachi Simada, Satoshi Kumagai, Toshiro Takeyama, and Masaaki Izumi

60 Combined Free Convection and Radiation Heat Transfer in Rectangular Cavities with a Partition Wall
Hiroshi Nakamura, Yutaka Asako and Haruhiko Hirata

83 Solidification of Supercooled Liquid Droplets — Aqueous Solution of NaCl
Koichi Ichimiya and Yasunori Mochizuki
